**ROTH, Circuit Judge:**

**ORDER AMENDING SLIP OPINION**

**IT IS ORDERED** that the published Opinion in the above case, filed on July 30, 2009, be amended as follows:

**On page 5**, delete the following paragraph:

Following this test, Doroshow visited Leo McCluskey, M. D., and ALS specialist, on July 27, 2005. Dr. McClusky wrote that "Doroshow demonstrates evidence of a lower motor neuron process affecting his right leg" and that "[h]e has no upper motor neuron signs." Accordingly, Dr. McClusky felt that "[t]hese are features that do not support the diagnosis of amyotrophic lateral sclerosis or a progressive motor neuron disorder." Doroshow was under Dr. McClusky's treatment for motor neuron disease between April 1, 2000, and June 30, 2006. Dr. McClusky was ultimately the doctor who diagnosed Doroshow with ALS on May 15, 2007.

and **replace it with:**
